Booth No.: C101-7

KWI : Founded over 60 years ago by Dr. Milos Krofta, the company started by building water treatment and fibre recovery installations for the paper industry. With an extensive base of over 3.900 installations in all continents, the name KROFTA has become almost synonymous with the industry itself.

Today, KWI designs and manufactures a wide range of sophisticated, customizable equipment for water and wastewater treatment in industrial and municipal applications.

KWI is considered one of the pioneers of dissolved air flotation (DAF) technology and is the oldest existing DAF equipment builder in the world.

M-U-T GMBH

Address: Schießstattgasse 49, A-2000 Stockerau, Austria

Tel No.: +43 2266 603 0

Fax No.: +43 2266 603 202

Booth No.: C101- 4

M-U-T, the leading Company of environmental technologies in Austria, offers a complete spectrum of equipment to collect, process and recycle waste, waste water and water.

The M-U-T product programme enables full service from one source - engineering, manufacturing, delivery, assembling and start up.

Areas of activity :

Environmental Technology :

Composting plants system M-U-T Kyberferm, mechanical separating plants, mechanical biological waste recovery, recycling plants and pneumatic conveying systems

Conveying Technology :

Complete conveying systems for bulk material and unit loads

Sewage, Wastewater and Water Treatment Plants

Municipal Vehicles :

Rotopress drum refuse vehicles, Variopress compactor garbage vehicles, street sweeping and sewer cleaning vehicles, Vacuum trucks

AquFlow (formerly Hydroflo) has been manufacturing metering pumps since 1972 for Water and Wastewater treatment chemicals. Over the last 38 years these pumps have established a solid reputation for quality, accuracy, ease of use and durability. In fact there are several of the pumps sold in 1970s currently being used out in the field.

AquFlow makes a complete range of metering pumps from flow capacities that range from 0-13200 liters / hour and pressures up to 270 bar. The liquid end is available in corrosion resistant materials like 316 Stainless Steel, Alloy 20, Hastelloy C, PVC, PVDF and PTFE. Not surprisingly AquFlow is the pump of choice for dosing tough chemicals like Causitcs, Aclds, Sodium Hypochlorite and polymers.

Customers have come to expect valuable support from the very start with selection of the right pump for the application, to the ease of buying, installing and maintenance of AquFlow pumps.

The VAPURA water stations are the world's most innovative POU purified drinking water systems available; producing purified drinking water under vacuum.

Best described as 'distributed drinking water purification systems' for the home, office and factory; 6 models are available. The water stations produce between 10 to 240 liters of purified drinking water per day using cold vaporization vacuum technology. As NO FILTERS are used, the quality of water remains constant, producing fresh, crisp tasting drinking water, as nature intended.

Manufactured by Kambo Security Products Ltd. of Hong Kong, with over 30 years of manufacturing experience for the global markets, the Vapura water stations are of the highest quality.

ABB: a leader worldwide

For nearly 50 years, ABB has been equipping thousands of water plants and networks, providing products, systems and services in over 100 countries worldwide.

ABB provides expertise and solutions for all activities related to the water lifecycle, from water intake to re-introduction into the environment

A complete portfolio

ABB provides complete solutions for the electrical and automation processes: drives and motors; instrumentation; control products and PLCs (programmable logic controllers); low-voltage, medium-voltage and high-voltage switchgears and components; transformers; SCADA systems (Supervisory Control and Data Acquisitions); DCS (Distributed Control Systems); communication networks; optimization and Asset Management solutions. The products and solutions portfolio is completed by a wide range of services in engineering, consulting, construction and maintenance. ABB is the ideal partner for ICE (Instrumentation, Control and Electrification).

Bina Plastic Industries Sdn. Bhd. was established in 1973. We specialize in manufacturing plastic piping system for buildings and construction industry. We provide various kinds of plastic piping products including Unplasticised Poly Vinyl Chloride (U - PVC), Modified Poly Vinyl Chloride (M - PVC) High Density Poly Ethylene (HDPE) and Acrylonitrile Butadiene Styrene (ABS).

Our products that come with our trademark "BBBTM" are used in broad cross section of markets

- Water reticulation
- Industrial application
- Soil, waste and ventilating system
- Rainwater drainage system
- Underground sewerage and drainage system
- Irrigation system
- Electrical and telecommunication conduits

Being one of the leading manufacturers of plastic pipes and fittings in Malaysia, our company has many business trades with local water supply players consisting of private and government companies. Our products are also exported to the countries such as Singapore, Indonesia, Brunei, Vietnam, Australia and Middle East countries.

BIO-FOCUS SAINTIFIK SDN BHD is a leading distributor of innovative products and solutions in Environmental, Life and Industrial Sciences.

Our products include:

- Flow injection Analyzer (Lachat Instruments)
- Ion Chromatography (Lachat Instruments)
- General lab equipments
- Environmental Chambers, incubators, Ovens
- Vacuum concentrators.

Please visit us at our booth, K 517 to find out more about our products or you may contact us at 03 -5163 7000.

CCM WATER SYSTEMS SDN BHD

Address: Lot 4&6, Jalan Kemajuan Satu 16/17A, 40200 Shah Alam, Selangor

Tel No.: 03-5519 6666

Fax No.: 03-5519 3666

Booth No.: E206

CCM Water Systems was founded in 1981 under its previous name Enersave Water and became a member of Chemical Company of Malaysia Berhad (CCM) via an acquisition in April 2008.

CCM Water Systems is actively involved in providing turnkey solutions for water and waste water treatment systems. The solutions we offer include design and build, engineering, project management, installation, commissioning and Operation & Maintenance.

These are the technologies that we offer to the customers:

- Ultra-Pure Water Systems
- Boiler Feed (Demineralised) Water Systems
- Seawater Desalination Systems
- Industrial Wastewater Systems
- Municipal (Potable) Water Supply
- Recycle and Reuse of Wastewater
- Refurbishment and Upgrading Works
- Chemical Dosing Systems
- Chlorine Safety Systems

Out service team provides prompt and regular maintenance services to support our customers' plants. We also carry out repairs and retrofitting of existing systems to upgrade their overall solution. In addition, CCMWS also handle trading for the consumables and spare parts such as Filmtec RO membranes, Dowex resins, chemicals etc., as part of our after sales service.

Booth No.: D401

Endress+Hauser will highlight its competency in measuring instrumentation for water and waste water industry during Asia Water 2010. Our highlights this year will be the digital sensor technology (Memosens) for pH glass sensors and glass-free, ISFET sensors, ORP sensors, dissolved oxygen sensors, and conductivity sensors, True Online COD Analyser, ISE measuring system for ammonium & nitrate, Portable Clamp-On Ultrasonic Flowmeter, compact and low-weight wafer magnetic flowmeter and lap-joint flanges magnetic flowmeter.

We are a global supplier of process automation solutions. We design and manufacture a full complement of industry-optimised measurement instrumentation for every step of the process. Endress+Hauser stands for continuity, industry know-how and long-term customer relationships. However, there is one feature common to all Endress+Hauser instruments: With our world-wide experience we help you to design a process that treats the environment and your financial resources with the utmost care.

Since 1972, seepex has led the way with innovative developments in progressing cavity pumps. Smart Stator Technology is the greatest single development since the pc pump was invented in the 1920s.

Visit seepex to see the new design that is the future of progressing cavity pumps. The axially split stator enables a new stator to be fitted in just a few minutes compared with several hours on a comparable 'standard' pump. It can be supplied on new pumps or retrofitted to existing seepex pumps. Further benefits include increased stator life and reduced component weight.

Booth No.: D114

BioFil AE is a new technology for treatment of domestic wastewater which is compact and reliable to meet the new 2009 stringent sewage effluent standard with ammonia nitrogen removal. The new product is enhanced process utilising anaerobic-anoxic-aerobic biofilter configuration. The system can reduce ammonia nitrogen to below 5 mg/l which provide solution to many Sewage Treatment Plants (STP) in sensitive catchments. Upgrading of STP to eliminate ammonia requires simple step and done at reduced time. The product is a success story of Technofund Project with UPM, Pakar Management Technology (M) Sdn Bhd and IWK participated as partners.
