

VIET WATER 2008

Ace Environment Pte Ltd

ELODE, dewatering revolution with Electro-Osmosis Technology. designed for '2nd' stage of sludge dewatering, installed after the conventional dewatering machine.

- » Reduces sludge disposal cost 40% - 75%
- » Save > 70% energy as compared to standard drying technique
- » Reduces storage cost
- » Reduces Pathogens
- » Low odour makes handling and recycling very easy

Andritz Singapore Pte Ltd

Andritz offers a wide range of products including automatic fine screen, belt thickener, drum thickener, belt press, decanter centrifuge, screen scroll centrifuge, chamber filter press, membrane filter press, hyperbaric disc filter, vacuum drum filter, fluidized bed dryer, belt dryer and drum dryer.

Beijing Crystec Technologies Co., Ltd

Beijing Crystec Technologies Co., Ltd specializes in the research, development and water treatment systems and membranes for industrial, commercial and residential use. The membrane modules have been widely applied to water treatment and air filtration processes in areas such as electronics, food processing, medicine, chemical manufacturing and environmental protection.

Bioclear Sdn Bhd

Established since 1986, Bioclear Sdn Bhd is involved in sewage, water and wastewater treatment plants, oil separators, wastewater treatment equipment, HDPE water control gates/valves and related systems and products.

In this Show, Bioclear will highlight:

- a) Oil Separator.
- b) Rowat HDPE Sluice Gates/Flap Valves/Weir etc.
- c) Cosme Wastewater Treatment Equipment

Clean Water Solution

Clean Water Solution - Water supply and purification

We provide a wide range of products and services to make clean water available. If you visit our stand we present you our smallest water cleaning machine, which supplies you drinkable water without any chemical addition.

Continental Industrie Asia Pacific

Since 1973, Continental Industrie has been recognized as Europe's leading manufacturer of vertically split, cast iron and cast aluminum, Multistage Centrifugal Blowers & Exhausters for air and gas handling applications. Our blowers are used for tank aeration and back filter wash in Waste Water treatment.

CST Industries Inc.

CST INDUSTRIES, INC (USA) specializes in the DESIGN, MANUFACTURE, SUPPLY and ERECTION OF PRE-ENGINEERED SECTIONAL BOLTED AND FACTORY COATED TANKS and ALUMINUM GEODESIC DOMES which are used in a wide variety of applications including water and wastewater, power generation, oil & gas, fire protection... With over 100 years of heritage and tanks providing in over 120 countries, CST's tanks that have been approved by customers are BETTER - FASTER - CHEAPER - SAFER. With 4 production plants (ISO 9000 certified) in two countries (USA and England), we have the capacity and flexibility to meet all your above ground storage needs.

DHV B.V.

Gateway to solutions.

Diann Bao Inc.

Taiwan AirMac Linear Air Pump

Product Features:

Low Noise and Low vibration, Low Power Consumption, Simple, Maintenance, Durability (long service life), No Lubrication Necessary (no contamination or pollution)

Applications : Aerobic Wastewater Treatment, For Septic Tank, Biological Contact Aeration Oxygen Supply for Fish Tanks and Ponds...and many more.

Ebara Vietnam Corporation

Visit to our EVC (Ebara Vietnam Corporation) at booth 108. EVC has been enjoying environmental businesses in Vietnam since 1996 with a 100% EBARA's owned capital and technology. Water is EVC's specialty.

(a) Reduction of T-N, (b) Pure water, (c) Recovery of wastewater, (d) Reduction of methane & CO2 in CDM scheme, (e) System & facility equipped to new building construction, are the theme for EVC in this exhibition.

Engtek Pte Ltd

Specialised in whole house water purification covering,

- central water, cleaning and filtration
- purified and filtered for direct consumption
- central rust, scale and bacterial cleaning and removal system
- shower head filtration
- kitchen clean water filters

ESPA Group

ESPA, headquarter in Banyoles, Spain, is devoted to the design, production and distribution of pumps and water systems for domestic, agricultural and industrial use. With 46 years experience, ESPA with the characteristic of innovation provide our customer the professional solution in water and energy sectors.

Euroflo Pumps International Pte Ltd

Euroflo Pumps International Pte Ltd specializes in a range of pumps which include End Suction, Closed Coupled, Self Priming, Split Casing, Vertical In-Line, Self Priming Turbine and Multistage Pump. We also provide a wide range of premium pump systems, providing solution to the various industries and application.

Festo Pte Ltd

Festo Vietnam is a subsidiary of a German company Festo AG and Co. Besides being a specialist in the area of Industrial automation, Festo is a key player in the water and waste water treatment industry and has been involved in major water projects in Asia and Europe.

Flotech Controls Pte Ltd

Flotech Controls is committed to continuously provide products, systems and services with best quality and value according to customers' requirements in the field of industrial measurements, valves, controls systems and SCADA in Singapore and the region.

GE Water & Process Technologies

GE Water & Process Technologies, a world leader in water, water reuse, waste water treatment and process solutions, brings the best technologies to enhance GE customers' efficiency while protecting our environment. GE offers broadest portfolio of water & process technologies including: separation equipment, membrane and filtration technology; specialty chemicals; mobile water; services.

GEA Westfalia Separator

GEA Westfalia Separator is a German based manufacturer of high speed centrifugal separation equipment. Applications include dewatering of sludge at waterworks, sewage works and industrial waste treatment plants.

The company is a member of the GEA Group, a globally active, successful conglomerate with core competencies in engineering and high precision manufacturing.

Georg Fischer

GF Piping Systems provides solutions for industrial systems, gas and water utilities and building technology. Its complete programme encompasses pipes, fittings and valves made of plastic, malleable cast iron and brass. Its products also include sensors and instruments as well as welding technology.

Grundfos

Grundfos is a major manufacturer of innovative stainless steel pumps for the water treatment industry. Our pumps do not contaminate pure water and can cope with range of pressures. Water treatment specialists choose Grundfos not only for our excellent, reliable product range, but also for our expertise and support network.

H Plus R Environmental Engineering Co., Ltd

H+R is an environmental engineering company specialized in water/wastewater treatment turn-key project and supply of hydraulic related equipments. H+R is one of experienced and comprehensive engineering company leading in Taiwan and has been evaluated as an Outstanding Environmental Engineering Firm by EPA of Taiwan. H+R provides the tailor-made projects to satisfy various customers.

HACH Vietnam

"Importance is the quality and innovation" is our company's brief. We will pay attention to set and maintenance pour brand, and do our best to...

Hangzhou Tiger Water Treatment Equipment

"Importance is the quality and innovation" is our company's brief. We will pay attention to set and maintenance pour brand, and do our best to...

HCTH Technology Ltd

HCTH Technology Inc. is a research and production center for applied biotechnology in water treatment. We specialize in providing safe water solutions, with a core competence for arsenic removal technologies. The company foundation is a result of a Swiss-Vietnamese cooperation, which successfully combines international management and manufacturing know-how with novel technology research and development.

HCP Pump Manufacturer Co., Ltd.

HCP Pump Manufacturer Co., Ltd. was established in 1979, with professional technique and abundant experience, more than dozen series and 300 various models of submersible pumps have been developed to meet all customer's requirement, for aquaculture, agriculture irrigation, waste water treatment, and others applications.

HOMA Pumpenfabrik GmbH

HOMA is a leading manufacturer of high quality submersible pumps, lifting stations, submersible mixers, tank cleaning systems and control panels. HOMA supplies a product range which sets standards in submersible pump technology. HOMA pumps operate worldwide in private, municipal and industrial waste water treatment sectors. HOMA quality – made in Germany.

Hongkong Yaxi Trade Limited

Yaxi Group-The professional supplier in design, plan, technical, execute and manage all of environment project in different industries.acts with modern industrial management manners, applies experiences and advance technologies from developed countries. We also provide the Pure water、Soft water、filtering water equipment , Reclaimed water reclaiming and Waste water...

Inter-Chemicals Sdn Bhd

ITS Water Management division, Inter-chemicals Sdn Bhd, offers full range of products and services of water (boiler & cooling water) treatment chemicals, water quality instrumentation, control and monitoring systems to the industries. Our passion in science & technology equipped with 3 decades of experience are the reason for the success of ITS. We are able to provide a complete range of service encompassing every type water treatment need and a "Total Water Management" expertise to solve industrial problems. Our ISO 9001:2000 certification, CTI membership and NSF Registered Boiler Water Treatment chemicals exemplify our commitment to qualify and regulations compliances. In Vietwater 2008, we will exhibit our ScaleGard Chemicals, Samyang Trilite Ion Exchange resins, Myrol L Company & HM Digital Water Testing Meters, and Advantage control Metering Pumps & Controllers.

ISEA-APB

SEA-APB is a joint venture between ISEA Group of Italy and APB Environnement of France. ISEA Group is a global manufacturer of innovative wastewater treatment systems with an extensive experience in pre-engineered and fully assembled treatment plants. APB Environnement is a company specialized in the biological treatment of organic pollutants.

ITT Water & Wastewater Hong Kong Ltd.

ITT Water & Wastewater is a leading global player in the water business operating in some 140 countries. Through our 4 key products brands – Flygt, Sanitaire, Wedeco, Leopold, our products serve pumping, aeration, disinfection, filtration functions as well as integrated solutions that make possible the transport and treatment of water and wastewater for customers world wide.

Jam Hom Co., Ltd

Jam Hom Co., has been in the business for 10 years. We are a manufactory of R.O. system and filters, and export products to all over the world. Jam Hom gives better water, better taste.

Lestari Water Services (M) Sdn Bhd

Lestari Water Services (Malaysia) Sdn Bhd, LWS (a construction and trading company) was incorporated in Malaysia on 29 June 2002.

We are specialized in 'Hot Tapping' and 'Line Stopping' services and as a manufacturer in the supply of Hot Tapping Machines and fittings.

Megapadu Sdn Bhd

Megapadu Sdn. Bhd.(198069-V) is the ISO 9001:2000 QMS certified company as manufacturer, distributor and sole agent of Eurostandard S.p.A. of Italy for Polyethylene fittings, namely Electrofusion fitting, Spigot Fittings, Electrofusion Welding Machine, Transition Joints as well as Tools and Accessories. Our products have been widely used and approved by the Water, Gas and other chemicals. All fittings are injected moulded using polyethylene polymers type PE 80 and PE 100 suitable for pressure pipelines for the distribution of water, gas and other fluids.

Mettler Toledo

Process Analytics product from Mettler-Toledo is on-line measurement/controller in water and wastewater step. We're specializing in parameter pH, DO, Conductivity, Ozone, Turbidity, TOC and Flow measurement. All advance technology were develop from INGOLD/THORNTON who specialist in water measurement.

NORD Gear Pte Ltd

Getriebebau NORD, headquartered in Bargteheide near Hamburg, Germany, has been developing, manufacturing and distributing drive technology since 1965. The technical sophistication of both the mechanical and the electronic components has earned NORD a leading position in the drive industry worldwide.

NSF International

NSF International helps protect your company and its customers by certifying products + writing standards for food + water. As an independent, not-for-profit organization, NSF's ongoing public health commitments is to encourage everyone to live safer.

Oakwell-Breen Pte Ltd

Oakwell-Breen - Your Preferred Partner in Flow Control Solution, represented several manufacturers for their products in the water and wastewater application. As a Preferred Partner, we strive to offer our clients with products that meet the application requirements at competitive prices, as well as competent technical support.

OKM Valve (M) Sdn Bhd

Okumura Engineering Corp. are the manufacturer from Japan and produce OKM Butterfly Valve and Knife Gate Valve since 1898. We have manufacturing plant in Japan and Malaysia. OKM have being widely know in the water supply industry which supply OKM Double Flange Butterfly Valve as comply to BS EN 593.

Phuc Ha Co., Ltd

DEKKO25 is the name of high quality PP-R plastic pipes and fittings manufactured in accordance with Germany standard DIN 8077-8078 by Phuc Ha Company. DEKKO25 is ideal for the carriage of liquids and gases. The product system is available at Stand Number F41, Vietnam Water Exhibition 08

PIPECO Safe Water Solutions Sdn Bhd

PIPECO is one of the most prominent manufacturer of hot pressing GRP panel water tank in the world today that believes in delivering high quality products with specified products performance and attaining overall customers satisfaction from any installation for clean and drinking water.

Purification Technology (Asia) Sdn Bhd

Puritek Multi-Component/Layer Non-Woven GDF Filter Cartridge.

PMT Water Engineering

PMT Water Engineering based at Acacia Ridge Brisbane Australia core services, are design & Construct of Bolted Steel Tankage with sizes to 60 megalitres and portable water treatment units, for potable, sewage & re-use waters, manufactured to Australian Standards & International Codes.

Process Equinix Pte Ltd

We are the manufacturer and supplier of Mixers/Agitators, PC pumps and other industrial equipment.

Professional Industrial Device Company

Supply water equipment and None Revenue Water solution like:
 - Water & waste water pump for water well...
 - Datalogger with GSM communication
 - Leaking water fiding equipment

Resintech Berhad

RESINTECH is fully integrated group involved in the Innovating, Designing, Manufacturing and Marketing a diversified range of uPVC and Polyethylene products. Building the new frontier for the Construction Industry, it has the distinction of being a 'ONE STOP CENTER' for contractors, developers and building material dealer.

RWT Tanks Sdn Bhd

RWT Tanks Sdn Bhd is the specialist Permastore glass-fused-to-steel bolted tank and silo supplier and installer pioneering from Malaysia for more than 17 years of experience. More than 500 tanks have been successfully installed for storage of potable water, industrial wastewater and sewage.

SAER Elettropompe S.p.A

Leading pump solution for better life.

SIEMENS

SIEMENS

Taking Care Of The World's Water

Siemens is a well-known water treatment equipment and service provider worldwide. More than 200,000 installations around the world illustrate our product, process and service expertise. Siemens develops drinking water and wastewater technologies that save the world's water.

Smart Filter (Malaysia) Pte Ltd

Manufacturer Of Water Vending Machines. We provide a profitable and hassle-free way of selling healthy filtered water to the public.

SYSTEA SpA

SYSTEA Micromac C is an on-line analyzer designed for automatic monitoring of chemical compounds in water; more than thirty parameters are available, including Nutrients, Total N, Total P, COD, TOC and many metals.

The patented "Loop Flow analysis" technology allows the measurement of up to four compounds in the same device.

Tremendous Industries Sdn Bhd

Tremendous Industries Sdn Bhd primary involved in design & fabrication of industrial water treatment systems. We are specialized in Reverse Osmosis Water System for brackish and sea water, Pre-Treatment Water Filtration System, Drinking Water System, Ultra-filtration Water System, Under Ground Filtration System, and etc.

Vangiang Development Investment Jsc.

Vangiang Jsc., specializes in accessories for water supply and drainage. We started its existence on May in 1999, with nearly 10 years experiences. Our main businesses are supplying including but not limited to series kind of Valve(TKV, SJV, ANA, AVK...), Pipe (Xinxing, vinapipe...)and fittings.

VAN -TEK Valve Corporation

We are professional maker of valves and pipe fittings for water, chemical, building and sanitary systems from Taiwan. Stable quality with competitive prices are our only target.

Vermeer Asia Pacific

Vermeer NAVIGATOR horizontal directional drills help make water/sewer piping installations more productive and efficient. Our drill rigs, from small to jumbo, range from 5500 to 330,000 pounds of pullback force and 550 to 55,000 ft-lb of rotational torque.

HammerHead Mole pneumatic and static tools are perfect for pipe-bursting when rehabilitating or upsizing water and sewer lines. These tools are ideally suited for 4 to 36 inch water and sewer rehab projects and offer minimal above-ground disruption.

Veolia Water Solutions & Technologies

Veolia Water Solutions & Technologies (VWS) is a water and wastewater treatment specialist operating on a global scale through local teams in over fifty countries. VWS's extensive range of technologies and services, coupled with its design and build capabilities, meet the diverse needs of both municipalities and industry.

Water & Wastewater Asia

Water & Wastewater Asia has witnessed various changes and developments within the water and wastewater industries worldwide. With a regular news section and feature on relevant projects, application stories, academic discussions and interviews with industry players, technical articles from the experts in their respective fields.

Water Power Technology Corp

Design, Manufacture & Filter press related support equipment for removing solids from liquids, Dewatering & Liquid.

Watertest Systems Pty Ltd

Watertest Systems is a leading supplier and manufacturer of chemical test kits and reagents for testing water in a variety of industrial processes for the Asia-Pacific region. We are also the official agent for CHEMetrics in the Asia-Pacific region.

Zenit Asia Pacific Pte Ltd

ZENIT specializes in the design and manufacture of high quality submersible pumps and related waste water treatment equipment for the building services, pumping and waste water treatment industries. From the inception of the company since the 1970s, Zenit has today become the largest submersible grinder pump manufacturer in Italy.
